Worksheet  Comparing Regressive, Progressive, and Proportional Taxes

Theme 3: Fairness in Taxes
Lesson 5: How Taxes Affect Us

Key Terms
progressive tax—A tax that takes a larger percentage of income from high-income groups than from low-income groups.
proportional tax—A tax that takes the same percentage of income from all income groups.
regressive tax—A tax that takes a larger percentage of income from low-income groups than from high-income groups.
vertical equity—The concept that people in different income groups should pay different rates of taxes or different percentages of their incomes as taxes. “Unequals should be taxed unequally.”

Summary
In the United States there are progressive income taxes and regressive Social Security and property taxes. Excise taxes and user fees are somewhat regressive. This combination results in taxpayers paying roughly the same percentage of their incomes in taxes, creating a proportional system. Vertical equity is the concept that people in different income groups should pay different rates of taxes.
Activity 1
Complete the line graphs to compare how a regressive tax, a progressive tax, and a proportional tax affect different income groups.

1. Plot the curve on the graphs by joining the dots.

Regressive

- 1. 30% for $10,000
- 2. 4% for $50,000
- 3. 2% for $100,000

Progressive

- 1. 10% for $10,000
- 2. 20% for $50,000
- 3. 30% for $100,000
2. According to the tables below, what amount of tax would people in each tax system pay?

Write the amounts over each dot on the line graphs.

### REGRESSIVE TAX

<table>
<thead>
<tr>
<th></th>
<th>Income</th>
<th>Percentage of Income Paid in Tax</th>
<th>Amount of Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family A</td>
<td>$10,000</td>
<td>20%</td>
<td>$2,000</td>
</tr>
<tr>
<td>Family B</td>
<td>$50,000</td>
<td>4%</td>
<td>$2,000</td>
</tr>
<tr>
<td>Family C</td>
<td>$100,000</td>
<td>2%</td>
<td>$2,000</td>
</tr>
</tbody>
</table>

### PROGRESSIVE TAX

<table>
<thead>
<tr>
<th></th>
<th>Income</th>
<th>Percentage of Income Paid in Tax</th>
<th>Amount of Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family A</td>
<td>$10,000</td>
<td>10%</td>
<td>$1,000</td>
</tr>
<tr>
<td>Family B</td>
<td>$50,000</td>
<td>20%</td>
<td>$10,000</td>
</tr>
<tr>
<td>Family C</td>
<td>$100,000</td>
<td>30%</td>
<td>$30,000</td>
</tr>
</tbody>
</table>

### PROPORTIONAL TAX

<table>
<thead>
<tr>
<th></th>
<th>Income</th>
<th>Percentage of Income Paid in Tax</th>
<th>Amount of Tax</th>
</tr>
</thead>
<tbody>
<tr>
<td>Family A</td>
<td>$10,000</td>
<td>20%</td>
<td>$2,000</td>
</tr>
<tr>
<td>Family B</td>
<td>$50,000</td>
<td>20%</td>
<td>$10,000</td>
</tr>
<tr>
<td>Family C</td>
<td>$100,000</td>
<td>20%</td>
<td>$20,000</td>
</tr>
</tbody>
</table>
Activity 2

1. Is the state gasoline tax regressive, progressive, or proportional? Why?

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

2. Do you think that excise taxes on such consumer products as automobile tires, jewelry, cosmetics, and travel would be regressive, progressive, or proportional? Why?

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________

3. Do you think that high excise taxes on items such as tobacco or alcohol should be used to discourage people from consuming those items?

____________________________________________________________________

____________________________________________________________________

____________________________________________________________________
Activity 3
Read the passage below and answer the following questions.

The FICA tax is levied on employers, employees, and certain self-employed individuals. Revenue goes to Social Security and Medicare. In 2023, the employee’s contribution to the retirement part of the FICA tax was 6.2 percent of the first $160,200 earned in wages and salaries. (Medicare is withheld on all wages and tips.) People with income from interest and dividend payments do not have to pay any Social Security tax on this income.

1. Over the wage and salary income range of $0 to $160,200, was the Social Security tax regressive, progressive, or proportional? Why?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

2. For employees who earned more than $117,000, was the Social Security tax regressive, progressive, or proportional? Why?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

3. For people with income from interest and dividend payments, is the Social Security tax regressive, progressive, or proportional? Why?

________________________________________________________________________
________________________________________________________________________
________________________________________________________________________

4. Some people worry that Social Security will not have enough funds to cover retirees in the future. Do you think the FICA tax rate or the taxable limit should be raised to cover any possible shortfalls? Explain your answer.
