990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part III Line 3	Estimated bad debt attributable to patients eligible for charity care was calculated by running a report within our patient revenue software of all bad debt account balances greater than 25,000. Part III Line 3	The estimated bad debt attributable to patients eligible for charity care of 207,813 should be considered community benefit due to the fact that anyone with outstanding balances of 25,000 or greater usually qualifies as catastrophic if the patient completes the application process.

990 Schedule H, Supplemental Information

Form and Line Reference	Explanation
Part III Line 3	In our charity care policy, we define catastrophic care as any illness or injury that will likely require continuous or frequent treatment for more than one year. Part III Line 4	Wheeling Hospital, Inc.'s financial statements are prepared on a consolidated basis as a member of the WV United Health System. The footnote for Accounts Receivable is as follows Patient accounts receivable are reported at net realizable value. For accounts receivable associated with services provided to patients who have third-party coverage, the System estimates net realizable value based on the estimated contractual reimbursement percentage, which in turn is based on current contract provisions and historical paid claims by payor. For self-pay accounts, including uninsured and patient responsibility accounts, the net realizable value is determined using historical collection experience, adjusted for estimated conversions of patient responsibility portions, expected recoveries and changes in trends to estimate implicit price concessions. Management continually reviews the estimated net realizable value of accounts receivable by monitoring cash collections, economic conditions and trends, changes in payor mix, changes in federal or state healthcare coverage and other matters.

Group Wheeling Hospital, Inc. Line Part V, Section B, Line 11	<p>Unhealthy lifestyles - Unhealthy lifestyle choices contribute to other health conditions. Smoking, poor nutrition, and physical inactivity are prevalent among residents in the service area. Tobacco is the leading cause of preventable illness and death in the United States. It causes many different cancers as well as chronic lung diseases, such as emphysema, bronchitis, and heart disease. Community culture, lack of health care coverage, and low income can lead to unhealthy lifestyle choices. The Hospital will continue to provide outreach and education for smoking cessation, proper nutrition and the importance of physical activity. In addition, the Hospital will continue to assist with health and wellness programs and provide the necessary resources for those seeking a healthy lifestyle through diet and exercise. Wheeling Hospital, Inc., provided outreach and education for smoking cessation, proper nutrition and the importance of physical activity to approximately XXXXX community members during October - December 2021. XXXX community members participated in health lifestyle programs during October - December 2021. Particular attention was given to health wellness education for the older adults in the community, given the aging population in the Wheeling Hospital, Inc. service area. The Hospital will continue to assist with health and wellness programs and provide the necessary resources for those seeking a healthy lifestyle through diet and exercise.</p>
Group Wheeling Hospital, Inc. Line Part V, Section B, Line 11	<p>Drug and alcohol abuse - Abuse of alcohol and illicit drugs is costly to our nation, exacting over 400 billion annually in costs. The toll that drug and alcohol problems have on individuals is significant, as they are at increased risk for serious health problems, criminal activity, automobile crashes, and lost productivity in the workplace. But individuals with drug and alcohol problems are not the only ones who suffer. The families, friends and communities also suffer greatly. The abuse of alcohol and drugs leads to multiple acute and chronic adverse health outcomes, as well as a variety of negative consequences within the family unit, poor performance in school, or difficulties at work. Alcohol abuse leads to decreased inhibitions and impaired judgements that influence reckless and sometimes aggressive behavior. It also leads to high rates of motor vehicle accidents and injuries/deaths. On a chronic basis, it can lead to anemia, hepatitis and cirrhosis, pancreatitis, cognitive effects due to brain damage, fetal alcohol syndrome, low birthweight, and other poor health outcomes. Substance abuse problems commonly occur in conjunction with mental health issues. Illicit drug use was a recurring issue of concern in many of our interviews with community members. The problems of substance abuse involve three levels of intervention prevention, screening, and detection. These three opportunities require determined, collaborative action involving public health, education, health care, and criminal justice systems at the community level. The Hospital will maintain its collaboration and referral network to address patients needs with regards to addiction and abuse. The Hospital will continue to provide outreach and education to the residents of Wheeling and the surrounding communities. Additionally, Wheeling Hospital, Inc., will engage with local law enforcement and other community agencies in initiatives aimed at addressing the opioid epidemic that is currently ravaging the Ohio Valley.</p>
