Form and Line Reference	Explanation
Part VI, Line 2	<p>Methodist Healthcare formed a multidisciplinary team to conduct the 2016 CHNA. This team used a variety of data to ensure the assessment process was as accurate and comprehensive as possible. This included primary data, like focus groups and informal interviews with community members and key stakeholders, as well as secondary data, such as public health information and our own internal figures. The primary data was assessed for themes, while the secondary data was analyzed to determine how our community compared to peer counties (i.e., similar outcomes in morbidity and mortality, and similar drivers of health, such as social/economic factors, physical environment, health behaviors, and clinical access). Using Healthy People 2020 as a framework, we sought to answer the question: what are the health needs of our community? A health need was identified where these two criteria were met: 1) it was a theme among the primary data, and 2) related secondary data compared unfavorably to other communities. Additional information, like health disparity, severity, and number affected, was also incorporated where available. Additionally, we considered whether our system had the ability to impact the identified need, which further enabled us to prioritize our results. To do this, we took into account many factors, such as whether we already offer services to address the need, our ability to build upon existing initiatives, and any partners with whom collaboration would be possible. Using this methodology meant the prioritized needs have the following characteristics:</p> <ol style="list-style-type: none"><li>1. It's considered by our community to be a significant health need.</li><li>2. It's a health need in which, based on a collection of key indicators identified by public health experts, our community compares unfavorably to similar communities as well as national and state benchmarks.</li><li>3. Health disparities, particularly racial disparities, exist within this health need.</li><li>4. Compared to other health needs, more people are affected by this health need (e.g., prevalence), and/or they are affected more severely (e.g., mortality).</li><li>5. MLH has the ability to impact the health need.</li></ol>

Part VI, Line 4	<p>Methodist Healthcare Memphis Hospitals was founded by the Memphis, Arkansas, and Mississippi conferences of The United Methodist Church to serve a population of about 1.25 million people. We serve a broad cross section of our community, reaching many disadvantaged areas. Patients from around the country and all over the world find their way to us for care, but for the purposes of the Community Health Needs Assessment (CHNA), we identified Shelby County, Tennessee and DeSoto County, Mississippi as our primary service area. These two counties make up more than 75 percent of inpatient discharges across our system and is a representative sample of our patient population. The service area is comprised of forty-eight percent males and twenty-one percent females of child-bearing age, forty-eight percent African Americans, forty-two percent Whites, six percent Hispanics, and four percent other races/ethnicities. The average household income is \$66,530, and 59.3 percent of the population has at least some college education. MHMH is the largest TennCare/Medicaid provider in the area, with approximately 13,000 inpatients served each year. Le Bonheur Children's Hospital is the only pediatric hospital in the region serving children's primary and tertiary care needs. As an academic medical center, MHMH trains health professionals and furnishes specialized healthcare services not otherwise available in the region. MHMH is the primary practice location for The University of Tennessee School of Medicine. This distinction, along with the accompanying research, benefits the entire metropolitan community.</p>
